Product codes can be found in product data sheet tables. When placing an order, product codes should include the fully completed configuration part. The configuration code part should be placed after the main product code. The main product code and configuration part will appear as shown in the example below:

## The construction of a water and dual fuel radiator product and configuration code:

WGVPA051040

PRODUCT CODE  
(located in the table for the product)

K916ZX

CONIGURATION CODE  
(supplemented by hand)

### Example Configuration

**K 916 ZX**

Package code  
K - carton box

Plate color  
code

Connection code

## Structure of configuration code for electric radiators with a heating medium:

WLVPA051040

PRODUCT CODE  
(located in the table for the product)

K916E1DRYW

CONIGURATION CODE  
(supplemented by hand)

### Example Configuration

**K 916 E1 DRY W**

Package code  
K - carton box

Plate color  
code

Connection code

Heating  
element code

Cable Type code

## Epoxy primery

**E** - Code of epoxy primer is an extra processes.

WGVPA051040 K916ZX **E** — Extra processes or additions code

## Legend

Radiator available in a "water" version.

Radiator suitable for dual fuel connection. Electric heating element can be installed.

Radiator available in electric only version. It comes prefilled with a 'heating medium' and equipped with a heating element. All tested and ready to use.

Connection types dedicated for this radiator. The icon shows the flow and return connections for the radiator as well as the thermostatic valve and heating element position if applicable.

Suggested heating element power output for electric and dual fuel versions.

Weight.

Capacity.

Available in chrome finish.

No additional payment for a color.
